

uSee security solution for a manufacturing company

OVERVIEW

Our client Mondraker upgraded its security infrastructure at its U.S. headquarters by installing 25 uSee cameras. By adopting uSee's advanced video surveillance system, not only they improved the security of their premises but also took advantage of modern surveillance technologies to manage their facility more efficiently.

CLIENT

MONDRAKER US

Mondraker, founded in 2001, is an innovative brand dedicated to the design and production of high-performance mountain bikes. Known for their pioneering technologies, Mondraker has earned a reputation for creating cutting-edge bikes. With a global reach, their U.S. headquarters plays a critical role in managing distribution, customer service, and operational logistics.

Manufacturing

Boulder, Colorado, USA

CHALLENGE

As the U.S. headquarters handles a significant volume of bikes and components, Mondraker needed a reliable surveillance system to safeguard the facility efficiently. The company required a **system that ensured the security of their office areas while helping them keep track of deliveries and shipments throughout the day**. An added challenge was ensuring that the system was easy to manage and provided high-quality video playback for both live monitoring and reviewing incidents when necessary.

SOLUTIONS

Mondraker addressed these challenges by installing **25 uSee cameras** throughout their U.S. headquarters. The uSee system provided clear, high-resolution video footage, **enabling the security team to**

monitor key areas and entry points throughout the building. The **user-friendly interface of uSee** made it easy for Mondraker staff to review footage and respond to security events swiftly. Additionally, the **system's remote access capabilities** allowed management to stay connected to the facility even when offsite, providing peace of mind.

uSee from Arteco has been a great addition to our US facility. It is user-friendly which makes it easy to view cameras live and find and review recorded footage. The added benefit of real-time video-monitoring has brought an additional layer to our overall security plan.

Christopher Bogue
General Manager

BENEFITS

1

Improved Protection

The uSee cameras provided constant surveillance, helping prevent theft and unauthorized access to the warehouse.

2

Operational Oversight

With uSee, Mondraker was able to monitor day-to-day operations, and ensure smooth logistics.

3

User-Friendly System

The intuitive design of uSee's platform allowed Mondraker's staff to easily manage the surveillance system.
